Established in 1987, Escalon Ophthalmics introduced Betadine 5% ophthalmic prep solution and the first silicone oil approved for use in the US. Since that time, the company has grown and expanded its product offerings, now branding all of its ophthalmic products as Sonomed Escalon. What hasn't changed in that time is our commitment to providing the best products, outstanding service, and doing what it takes to get it right – pure and simple.
